Platforms: Web apps, native iOS and android apps.

AI Integration: RAG based documentation-aware chatbots, Plugin on Figma community, Microcopy review.

Languages & Markup: CLI, Python, JavaScript, PHP, Shell scripting, HTML/CSS, Markdown.

16 years of experience in technology and writing for the field of software, payments and healthcare. I am driven by a deep passion for technology.

Work Experience

Kissflow, Chennai
Staff Technical Writer

Jan 2024 – Present

- **UX writing, Developer documentation and User help documentations** - Authored help documentations, API and SDK guides, changelogs, pre-release notes for 100+ major features. [[Product documentations](#) and [developer docs](#)].
- **Authored Style Guide** - Developed and [standardized internal writing guidelines](#) to ensure consistency in tone, structure, and formatting across microcopy, product and developer documentation.
- **RAG Tools** - Built a RAG bot based on documentation knowledge to fetch quick answers along with sources. (github.com/RAG-chatbot-for-helpdocs). I have created a plugin called “CopyWise” for Figma community that works on AI.
- **Internal review tool** - Built an internal tool that webscrapes a testing build for strings and sends them to TechWriter’s Gspace — This tool is instrumental in reducing post-release copy fixes. ([github/KFPegasiStringsReview](https://github.com/KFPegasiStringsReview))
- **Leadership and mentoring** - I conduct knowledge sharing sessions, perform peer reviews, workshops and AI-implementations with junior technical writers at Kissflow.
- **Cross-functional Collaboration** - I work closely with project managers, engineers, and designers throughout the product development life cycle — Understanding product requirements, validating edge cases, and contributing to product development beyond copy and UXWriting. I am also contributing to technical documentations for sales.

Ippopay, Chennai*Apr 2021 – Dec 2023**Technical writing and content manager*

- **UX writing** - Crafted UX copy for 200+ features on native Android apps (built using flutter) and iOS using work and CMS tools Jira and Madcap flare respectively.
- **Developer documentations** - Authored API guides, integration documentations, and SDK guides, simplifying complex financial workflows for user advocacy.
- Worked closely with chief risk officer, product managers, engineers, and designers creating comprehensive documentation for payment apps including documentations for anti-fraud technology in online payments..
- Mentored, managed and reviewed peer team's writing, to ensure copy is intuitive, frictionless, and aligned with user expectations.

Krea healthcare, Chennai*May 2016 – Apr 2020**Technical writing - Content analyst*

- **Content for Healthcare hardware applications** - User guides, and release notes for healthcare applications used by hospitals and healthcare providers.
- **Technical Editing** - Championed technical content for healthcare with clarity, accuracy, and consistency. - Curated user-friendly installation manuals and training guides for software applications designed to improve patient care, streamline hospital workflows.
- **Collaborate with Cross-Functional Teams** - Team collaborations on technical accuracy and issue tracking with product developers, and client-facing teams.

Indian Institute of Technology, Chennai*May 2012 – Apr 2016**Technical writing - Project associate*

- Authored detailed technical documentation, including model training workflows, system architecture guides, and deployment manuals.
- Created user manuals and integration guides for interactive ASR (Automatic speech recognition) tools.
- Documented outcomes for research publications, grant reports, and knowledge sharing; ensured clarity and compliance with institutional standards.
- Specialized in building machine learning hmm (hidden markov models) using HTK and SPHINX and creating Speech Recognition (ASR) systems for recognizing Indian languages.
- Built machine learning models for Narrow AI use cases using audio and transcriptions as training data.
- PHP, Asterisk-PBXs, Shell scripting, PostGre.

Tata Consultancy Services (TCS), Chennai
Software Tester - Mainframes

May 2010 – May 2011

- Software testing in mainframes for JP Morgan Chase's Client Central Unit.
- QC, QTP, and HP LoadRunner.

Professional memberships

- Member, **Society for Technical Communication (STC)** until dissolution in Jan 2025.

Education

Meenakshi Sundararajan Engineering College, Chennai
B.E in Electrical and Electronics Engineering

May 2006 – May 2010

Indian Institute of Technology Madras (May 2013), *Data science*
One credit coursework in Artificial intelligence and Signal processing at IIT Madras, contributing to Machine learning implementations and research.
